

Table 1 of the concept note represents the status of water resources information dissemination setup at state level. The table contains the information on data storage, application used for Geo-spatial data and Database Management, availability of website for water resources data dissemination, its development & maintenance and platform used for hosting by states.

The table has been filled by collecting the information available on the internet. The information provided in the table may be incomplete or may have missed some details as the information available on the internet is only mentioned. Hence, it is requested to States to kindly enter/fill the information for their respective states as per the availability. Any additional related information available with states may also be filled.

The instructions/procedure to fill the table are given below:

A	B	C	D	E	F	G	H	I	J
S. No.	State	Organization/ Department	Level of Consolidation of data	Name of the GIS Application Software	Name of the Database Software (Time Series data)	Public Access through web	Hosting Platform	Development	Maintenance
			Centralized (Server Based) Or Distributed among various wings (PC based)			Yes/No Domain Name	Cloud Or Inhouse data centre	Inhouse Or Outsourced	Inhouse Or Outsourced
1									

1. State and organization name have been filled in Column A & B respectively
2. States has to fill the information about the database storage whether it is stored in a centralized platform or it is stored in individual PCs of various wings in column D.
3. State has to fill the name of GIS Application Software used for creation of geo-spatial data at state level, if any in Column E.
4. State has to fill the name of Database Management Software used for managing the Database at state level, if any in Column F.
5. State has to mention the domain name for website/dashboard created by the state for water resources data dissemination in Column G.
6. State has to fill the hosting platform name i.e. cloud based e.g. NIC or any private cloud or In-house Data Centre (Physical form) in column H.
7. State has to fill the information about the development and maintenance of website for states' water resources data dissemination i.e. whether it is done by In-house or Outsourced to third party in Column J.
